Member of The Florida Circuit-Civil Mediator Society

Nature of Practice:

Forty-Two (42) years of trial practice experience in all areas of civil litigation including personal injury (both plaintiff and defense), first and third-party insurance claims, owner-contractor construction disputes, employment law, and general civil corporate matters. As a former insurance claims adjuster, as well as an independent adjuster prior to law school, I have had considerable experience in handling both first party claims as well as bodily injury and wrongful death claims. My current practice consists primarily of Mediating all such matters in both Federal and State Court. Since 1991, I have mediated thousands of first party insurance claims, both Residential and Commercial, and have served as an Arbitrator on such matters as well. I have also served as an Expert Witness on the issue of reasonable attorney's fees pursuant to F.S. § 627.428 as well as Proposals for Settlements and Contractual Prevailing Party provisions.

Other experience has included business and construction litigation as well

as Mediating hundreds of disputes between unit owners, developers, contractors, and Condominium Associations (pursuant to F.S. 718) and Homeowners Associations (pursuant to F.S. 720). Of these, many of the cases have involved windstorm and flood damage claims, as well as mold remediation and general repairs secondary to various weather-related events. My experience also includes Mediating Eminent Domain issues (pursuant to F.S. 73) real estate disputes, and Probate and Estate Litigation.
